Statement of reasons for allowance

Claims 4-7, 21-28 have been allowed.

Claim 4 claims the following:

A bipolar transistor wherein the base region includes a punch-through stop region of the second conduction type adjacent to the emitter region, and wherein the free carrier density of the punch-through stop layer where no depletion layer is formed is smaller than the space charge density of a depletion layer formed in the punch-through stop layer.

Claim 21 claims the method of making the transistor in claim 4.

The claimed characteristics of the bipolar transistor and the method of making such a transistor are neither rendered obvious nor taught by the prior arts.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fetsum Abraham whose telephone number is: 571-272-1911. The examiner can normally be reached on 8:00 - 18:00.
